

Anti-malware for business

Powerful anti-malware defense

FEATURES AND BENEFITS

- Anti-Malware/Anti-Spyware
- Malicious Website Blocking
- File Execution Blocking
- Malwarebytes Chameleon Technology
- Three System Scan Mode (Quick, Flash, Full)
- Advanced Malware Remediation
- Command-Line Interface
- XML Logging
- MSI Package

Because your current antivirus solution alone can't protect your network

As cyber-attacks increase in frequency and sophistication, IT managers are starting to realize that relying on only one antivirus technology exposes the network to attack. Each endpoint needs multiple layers of malware detection and remediation to ensure complete protection.

Malwarebytes Anti-Malware for Business meets this need. Malwarebytes delivers fast, lean malware protection designed to supplement your current endpoint security solution. Our robust heuristic scanning engine detects and eliminates zero-hour malware other security solutions miss, enhancing your security posture and closing detection vulnerabilities.

Malwarebytes Anti-Malware for Business isn't just another solution—it's the next iteration in enterprise endpoint security.

Key Benefits

Anti-Malware/Anti-Spyware

Detects and eliminates zero-hour and known viruses, Trojans, worms, rootkits, adware, and spyware in real time to ensure data security and network integrity. Extends its protection to Windows Server operating systems.

Malicious Website Blocking

Prevents access to known malicious IP addresses so that end users are proactively protected from downloading malware, hacking attempts, redirects to malicious websites, and malvertising.
