WEBROOT Smarter Cybersecurity

Webroot Business Endpoint Protection

Advanced Detection and Protection Against Malware, Ransomware, Phishing, and More

Business Endpoint Protection at a Glance

- **Secure and Resilient Distributed Cloud Architecture**
  We use multiple secure global data centers to support customers and roaming users globally with full-service resilience and redundancy

- **Layered User and Device Defenses**
  Stop attacks that take advantage of poor user awareness, not just those that target device vulnerabilities

- **Malware Detection, Prevention, and Protection**
  Prevent viruses, malware, Trojans, phishing, ransomware, spyware, browser-based attacks, crypto-jacking, credential-stealing malware, and wide range of other endpoint threats

- **Multi-Shield Protection**
  Endpoint Protection includes the following shields for predictive protection against zero-day threats: Real-Time, Behavior, Core System, Web Threat, Identity, Phishing, and Offline

- **User Identity and Privacy**
  The Identity shield component in Endpoint Protection is trusted by the world's leading banks to stop online banking-related attacks, including DNS poisoning, keystroke logging, screen grabbing, cookie scraping, clipboard grabbing, and browser and session hijacking by malicious software

- **White and Blacklisting**
  Admins have direct control over which applications are allowed to execute

- **Intelligent Firewall**
  The system-monitoring and application-aware outbound firewall augments the built-in Windows® firewall to protect users both on and off the corporate network

- **Infrared Dynamic Risk Prevention**
  This feature analyzes individual user behavior to dynamically tailor malware prevention

- **Powerful Heuristics**
  Admins can adjust these based on risk tolerance for file execution

- **Full Offline Protection**
  Stop attacks when offline or create separate file execution policies for local disk, USB, CD, and DVD drives

- **Multi OS, Virtualization, Terminal Server, and Citrix Support**
  Endpoint Protection supports MacOS® devices, Windows® computers and servers, as well as virtualization, terminal server, and Citrix environments

- **Multi-Language Support**
  The Webroot software agent supports over 14 languages

What Results to Expect

Webroot Business Endpoint Protection delivers advanced detection, protection, and prevention against the ever-increasing number of attacks small to medium sized businesses face. Because it's a highly automated and effective solution, businesses no longer need dedicated security resources or teams of experts on hand to stay safe. And with fewer infections and security-related incidents, not to mention fewer remediation cases and productivity losses, businesses can finally focus on what matters most: growing profitably.
